

e3 unveils first-of-its-kind, ultra-flexible Bandwidth on Demand for VSAT in conjunction with Speedcast

And announces official sponsorship of environmental charity Asociación Ondine

Palma de Mallorca – April 27, 2018: Palma-based e3 Systems, the leading global communications integrator and solutions provider for the marine industry, today revealed details of their innovative Bandwidth on Demand for VSAT service. Launched in partnership with Speedcast, the world's most trusted provider of remote communication and IT solutions, this groundbreaking new service launch is exclusive to e3 and the first to work with Kymeta™ KyWay™ flat panels.

By offering **bandwidth periods starting at just six hours, easy upgrades or downgrades**, and **unlimited data usage**, the service is fundamentally changing the way VSAT is delivered to yachts. With **no monthly charge when not used**, it makes bandwidth more affordable to more yachts.

“Together with e3, Speedcast is demonstrating our leadership in the market by delivering an innovative and customer-friendly way to subscribe to satellite connectivity. Customers use and pay for the satellite communications when they need it,” said Athina Vezyri, Executive Vice President, Maritime, Speedcast

Through e3's powerful HYBRID solution, Bandwidth on Demand for VSAT can be combined with the 4G on demand BIG DATA SIM, to provide uniquely tailored, cost-effective connectivity to meet a yacht's data demands at all times. This ultra-flexible service provides uninterrupted connectivity with unrivalled benefits.

In addition, e3 also announced today that for every Euro spent by customers on Bandwidth on Demand for VSAT and the BIG DATA EUROPE SIM, the company would donate a percentage to Asociación Ondine – a marine conservation charity working towards creating cleaner oceans.

Speaking at the Palma Superyacht Show, Roger Horner, Group Managing Director at e3 said: “We're very excited to be launching this new VSAT service with Speedcast as it marks a real step change in bandwidth delivery for yachts. I am also delighted that sales will be linked to such a deserving cause. The superyacht industry depends entirely on marine conservation to preserve the beautiful, turquoise waters of the Med, so it's invaluable that we all give something back.”

About e3 Systems

e3 is a leading communications integrator and solutions provider for the marine industry. The company connects yachts globally through a diverse portfolio of communication systems including its HYBRID solution which synchronises VSAT, Inmarsat, Iridium, 3G, 4G and Wi-Fi. In addition, it provides an extensive suite of services covering cyber security and training, IT and networks, data management, content provision and a unique, full vessel Support Operations Centre. e3 is the exclusive superyacht distribution partner for Kymeta communications solutions. The company operates from the Mediterranean and the USA with partners worldwide. It is part of the marine electronics group grupoarbulu.
